ATTORNEY

UNITED STATES PATENT OFFICE.

THEODORE E. SMITH, OF NEW YORK, N. Y., ASSIGNOR TO THE SPENCERIAN
PEN COMPANY, OF SAME PLACE.

DESIGN FOR A WRITING-PEN.

SPECIFICATION forming part of Design No. 29,964, dated January 10, 1899.

Application filed August 11, 1898. Serial No. 688,398. Term of patent 7 years.

To all whom it may concern:

Be it known that I, THEODORE E. SMITH, a citizen of the United States, residing in the borough of Brooklyn, New York city, county of Kings, and State of New York, have invented and produced a new and original Design for Pens, of which the following is a specification, reference being had to the accompanying drawing, forming part thereof.

The accompanying drawing is a plan view of a writing-pen, showing my new design.

As illustrated in the drawing, the leading or material feature of my design comprises the unitary article shown in the accompanying illustration; and it consists of a diamond-shaped hole A, formed in the body B of the writing-pen at a point back of the slit between the two pen-nibs *a a*. This diamond-shaped

opening or hole A is disposed or arranged centrally of the width of the pen, so that the prolongation of a line joining the two ends of the diamond will be coincident with the center line of the pen and the pen-slit.

Having described my invention, what I claim as new, and desire to secure by Letters Patent, is—

The design for a writing-pen, as herein shown and described.

In testimony whereof I have hereunto set my hand, this 10th day of August, 1898, in presence of the two subscribing witnesses.

THEODORE E. SMITH.
